# Ready Rosie

In an evaluation study done by Penn State Researchers, families were videotaped interacting with their child "as they normally would".

The families were individually recorded before and after a three-week exposure to ReadyRosie. Researchers analyzed the change in both the quality and quantity of language, using the following variables and seeing the following results:

## 80% INCREASE

TOTAL NUMBER OF WORDS

40% INCREASE

TOTAL NUMBER AND COMPLEXITY OF UTTERANCES (SENTENCES)

25% INCREASE

TOTAL NUMBER OF OPEN-ENDED QUESTIONS

60% INCREASE

TOTAL NUMBER OF CHILD RESPONSES

10% DECREASE

TOTAL NUMBER OF COMMANDS/ DIRECTIVES, LIKE "NO" AND "PUT THAT DOWN."

This study is ongoing.
