## Fun Fruit Graph

Graph fruits by their color.

### What to do

#### What you need

- *The Very Hungry Caterpillar* by Eric Carle
- Assorted Fruits
- Fruit Graph Copies
- Color Mat
- Crayons
- Bowl

**1**

Take each fruit from the bowl and place it onto the matching color mat (ex. *banana = yellow, apple = red, lime = green, etc.*).

**2**

On the Fruit Graph color each box horizontally according to the number of fruits of the same color (ex. *4 bananas, 4 yellow squares*).

**3**

*Which color is most of the food? Which colors have the same number of food items?*

#### For Parents

Graphing is a way of organizing things on paper. Make another graph on paper using the colors of your clothes instead of fruit.
