## Pom-Pom Toss

Play a game to see how the numbers 0 through 5 relate.

### What to do

#### What you need

- Yarn
- Pom-poms
- Crayons
- Data Collection Sheet

1

Select 5 pom-poms of your choice.

3

Toss each pom-pom into the circle one at a time. *How many landed inside and how many landed outside of the circle?*

2

Make a circle with the yarn.

4

Use the Circle Data Collection sheet to draw and record your score. *How many combinations of inside and outside the circle can you make?*

### For Parents

Knowing how numbers relate helps you become better at mental calculations. This comes in handy when you are comparing prices at the store. You may also use it playing games where you need to compare the scores of the players. Being able to think of numbers as sums of other numbers is very useful to build number sense.
