

A note from your teacher!

# Ready Rosie

## You'll want to remember this!

Your family is creating new memories every day, and you won't want to forget them! Why not write them down? This week, we are sharing simple ways to use hand-drawn pictures or photographs to prompt your child to write and remember the stories you don't want to forget.

<p>Watch the video with your child. If you don't have access to view videos, please read the description below!</p>	<p>Do the activity and mark "We did it!"</p>	<p>Reflect and share: How did it go? What did you learn?</p>
	<p><b>Sketching the Story</b> All Grades - Retell a favorite story by sketching simple pictures of the main events. Draw a large rectangle and divide it into several 3-4 smaller squares. Ask your child, "What happened in the beginning of the story? In the middle? How did the story end?" Encourage your child to retell the story to someone else, adding additional interesting details to further explain each drawing.</p>	<div data-bbox="915 785 992 863" style="text-align: center;"></div> <p data-bbox="894 890 1013 917" style="text-align: center;">We Did it!</p> <div data-bbox="1089 789 1179 842" style="text-align: center;"></div>
	<p><b>My Family Comic Strip</b> 2nd-3rd Grade - Make a comic strip illustrating a funny family story! Think about the conversations that you were having when the story took place. Show the sound effects and dialogue by using speech bubbles!</p>	<div data-bbox="915 1390 992 1467" style="text-align: center;"></div> <p data-bbox="894 1495 1013 1522" style="text-align: center;">We Did it!</p> <div data-bbox="1089 1394 1179 1446" style="text-align: center;"></div>
	<p><b>Picture Talk</b> All Grades - Look at some past family photos. Write some creative captions or speech bubbles that describe the story that was happening when the photos were taken.</p>	<div data-bbox="915 1761 992 1839" style="text-align: center;"></div> <p data-bbox="894 1866 1013 1894" style="text-align: center;">We Did it!</p> <div data-bbox="1089 1766 1179 1818" style="text-align: center;"></div>
